PROJECTS

ProConnect - Social Networking Platform | GitHub | **Live Demo** *Aug 2025 - Nov 2025*

MERN Stack (MongoDB, Express.js, React.js, Node.js), Tailwind CSS

Developed a full-stack professional networking platform enabling users to create profiles, share posts, connect with other users, and interact through likes and comments.

- Built secure authentication and authorization using JWT and implemented RESTful APIs for managing users, posts, notifications, and connections.
- Designed a responsive React interface with Tailwind CSS and optimized backend performance using MongoDB queries to ensure smooth user interactions.

WanderLust – Rental Platform | GitHub | **Live Demo** *Mar 2025 - June 2025*

MongoDB Atlas, Express.js, Node.js, EJS, Bootstrap, JavaScript

Built a full-stack rental platform inspired by Airbnb that allows users to list properties, browse rentals, and manage bookings through an intuitive interface.

- Implemented secure authentication and authorization with login/signup functionality and designed full CRUD operations for adding, updating, viewing, and deleting property listings and reviews.
- Integrated search and filtering features to improve listing discovery while following MVC architecture to maintain scalable and well-structured code.
